

NOX

Investor Pitch Deck V2

Urban Entertainment Infrastructure Platform

SLIDE 1 — COVER

NOX

Own The Night

Urban Entertainment Infrastructure Platform

Building the digital infrastructure layer for nightlife and live entertainment ecosystems across emerging ASEAN markets.

Initial Launch Market: Yangon, Myanmar

Expansion Vision: ASEAN Urban Markets

SLIDE 2 — THE PROBLEM

Nightlife Infrastructure Is Broken

Across Myanmar and emerging ASEAN markets, nightlife discovery and event operations remain fragmented and inefficient.

Consumers currently rely on:

- Facebook posts
- Telegram groups
- Instagram stories
- manual promoter messaging
- cash payments
- spreadsheets

There is no unified infrastructure layer for:

- nightlife discovery
- ticketing
- promoter operations
- venue analytics
- social engagement

The ecosystem operates manually.

SLIDE 3 — MARKET PAIN

Current Market Inefficiencies

Consumers

Users struggle to:

- discover real-time events
 - verify legitimacy
 - coordinate socially
 - purchase tickets efficiently
 - trust event information
-

Promoters

Promoters rely on:

- manual DMs
- spreadsheets
- cash handling
- social-media-only marketing

This creates:

- fraud risk
 - operational inefficiency
 - poor forecasting
 - weak retention
-

Venues

Venues lack:

- customer intelligence
 - audience analytics
 - structured marketing tools
 - operational visibility
-

SLIDE 4 — THE SOLUTION

NOX

Urban Entertainment Infrastructure

NOX combines:

- event discovery
- digital ticketing
- QR validation
- promoter dashboards
- venue analytics
- localized payment integrations

into one unified mobile-first platform.

This transforms nightlife from fragmented social coordination into scalable digital infrastructure.

SLIDE 5 — PRODUCT OVERVIEW

What NOX Does

Consumer Layer

- discover events
 - purchase tickets
 - receive QR entry passes
 - follow creators/promoters
 - access verified venues
-

Promoter Layer

- create events
 - manage ticket tiers
 - monitor sales
 - scan tickets
 - export guest lists
 - analyze attendance
-

Venue Layer

- audience insights
 - attendance forecasting
 - marketing tools
 - verified venue profiles
-

SLIDE 6 — WHY NOW

Timing Advantage

ASEAN nightlife ecosystems are rapidly digitizing due to:

- rising smartphone penetration
- increasing cashless payment adoption
- urban youth culture growth
- creator/music ecosystem expansion
- social-first entertainment behavior

Myanmar specifically presents:

- low infrastructure maturity
- minimal direct competition
- strong nightlife culture
- rapidly evolving digital payments

This creates a rare first-mover opportunity.

SLIDE 7 — MARKET OPPORTUNITY

Massive Underserved Market

Target Markets

Phase 1

Myanmar nightlife + live events

Phase 2

Regional ASEAN expansion:

- Bangkok
 - Kuala Lumpur
 - Manila
 - Ho Chi Minh City
-

Strategic Thesis

The same infrastructure inefficiencies exist across emerging urban entertainment markets.

NOX is designed to scale regionally.

SLIDE 8 — BUSINESS MODEL

Multi-Layer Revenue Engine

Phase 1 Revenue Streams

Ticketing Fees

3%–8% per transaction.

Promoted Listings

Sponsored event placement.

Venue SaaS Subscriptions

Analytics + operational tools.

Future Expansion Layers

- table reservations
 - digital beverage vouchers
 - VIP memberships
 - loyalty systems
 - nightlife analytics
 - creator monetization
 - fintech infrastructure
-

SLIDE 9 — WHY THIS MODEL IS POWERFUL

Beyond “Event App” Economics

NOX combines:

Marketplace Dynamics

More events → more users. More users → more venues.

SaaS Infrastructure

Operational tooling for promoters and venues.

Fintech Adjacency

Payment infrastructure, loyalty systems, future wallet expansion.

Behavioral Data Layer

Urban nightlife intelligence and demand analytics.

This creates multiple monetization layers simultaneously.

SLIDE 10 — PRODUCT EXPERIENCE

Consumer Experience

Discover

Users browse trending nearby nightlife.

Secure Entry

Purchase digital tickets instantly.

Attend

QR-based frictionless entry.

Social Layer

Future integrations:

- friend attendance
 - creator follows
 - event engagement
-

SLIDE 11 — TECHNOLOGY STACK

Lean Infrastructure With Enterprise Scalability

Frontend

- Flutter
 - Next.js
-

Backend

- NestJS
 - Supabase/PostgreSQL
 - Redis
-

Infrastructure

- Docker
 - Cloudflare
 - GitHub Actions
 - Firebase Messaging
-

Analytics

- PostHog
 - Metabase
-

Architecture Philosophy

Rapid MVP deployment with regional scalability readiness.

SLIDE 12 — COMPETITIVE POSITIONING

Market Gap Analysis

Traditional Platforms	NOX
fragmented discovery	centralized nightlife discovery
manual operations	operational infrastructure
cash handling	digital ticketing
weak analytics	venue intelligence
limited monetization	multi-layer business model

Strategic Positioning

NOX is not: “just another event app.”

NOX is:

Urban Entertainment Infrastructure

SLIDE 13 — GO-TO-MARKET STRATEGY

Yangon Launch Strategy

Initial Focus

- nightlife venues
 - DJs
 - promoters
 - music collectives
 - university communities
-

Acquisition Strategy

Promoter-First Expansion

The platform inventory depends on event organizers.

Primary onboarding:

- club promoters
 - event agencies
 - nightlife collectives
 - live music venues
-

Community Growth

Growth channels:

- influencer partnerships
 - nightlife creators
 - social amplification
 - campus ambassadors
-

SLIDE 14 — NETWORK EFFECTS

Why NOX Becomes Stronger Over Time

More Events

Increase platform relevance.

More Users

Increase promoter incentives.

More Data

Improves recommendations and analytics.

More Venues

Increase ecosystem defensibility.

Flywheel Effect

Promoters → Events → Users → Venues → Data → Better Discovery → More Promoters

SLIDE 15 — PRODUCT ROADMAP

Phase 1 — MVP

Core Features:

- event discovery
- digital ticketing
- QR validation
- promoter dashboard
- venue profiles

Timeline: 4 months

Phase 2

Expansion Features:

- social engagement
 - creator systems
 - loyalty infrastructure
 - table reservations
 - nightlife intelligence
-

Phase 3

Regional Infrastructure:

- ASEAN expansion
 - fintech integrations
 - wallet systems
 - creator monetization
-

SLIDE 16 — TRACTION STRATEGY

Early Validation Metrics

Initial KPI Targets:

Consumer

- 15,000 installs
 - 5,000 monthly active users
 - 35% retention
-

Marketplace

- 300+ listed events
 - 50+ active promoters
 - 20+ partner venues
-

Revenue

- positive ticket GMV growth
 - repeat promoter usage
 - initial SaaS revenue
-

SLIDE 17 — DEFENSIBILITY

Why Competitors Will Struggle

Localized Infrastructure

Built specifically for ASEAN nightlife behavior.

Payment Localization

Integrated local wallets and regional consumer behavior.

Operational Tooling

Promoter and venue dependency creates retention.

Behavioral Data

Nightlife demand intelligence compounds over time.

Brand Positioning

Premium urban culture identity.

SLIDE 18 — INVESTMENT USE OF FUNDS

Capital Allocation

Product Development

- mobile engineering
 - backend infrastructure
 - QR systems
-

Market Expansion

- venue onboarding
 - promoter acquisition
 - launch campaigns
-

Operations

- support
 - moderation
 - payment operations
-

Infrastructure

- cloud services
 - analytics
 - monitoring systems
-

SLIDE 19 — WHY NOX WINS

Core Strategic Advantages

1. First-Mover Opportunity

Myanmar nightlife infrastructure remains digitally underserved.

2. Strong Network Effects

Marketplace growth compounds platform value.

3. High Operational Pain Point

Promoters and venues already need these tools.

4. ASEAN Scalability

The infrastructure problem exists regionally.

5. Multi-Layer Monetization

Marketplace + SaaS + fintech adjacency.

SLIDE 20 — LONG-TERM VISION

Build The Operating System For Urban Entertainment

NOX begins with nightlife.

But the infrastructure can expand into:

- music festivals
- creator ecosystems

- hospitality
- nightlife fintech
- urban entertainment intelligence
- premium memberships
- digital experiences

The vision is significantly larger than ticketing.

SLIDE 21 — THE OPPORTUNITY

The Next Infrastructure Layer For ASEAN Nightlife

The nightlife and live-event ecosystem across emerging ASEAN markets remains structurally underbuilt.

NOX transforms:

- fragmented discovery
- manual operations
- inefficient payments
- weak analytics

into scalable digital infrastructure.

This is not simply a consumer app.

It is a foundational operating platform for urban entertainment ecosystems.

SLIDE 22 — CLOSING

NOX

Own The Night

Urban Entertainment Infrastructure Platform

Building the digital infrastructure layer for nightlife and live entertainment ecosystems across emerging ASEAN markets.
