

NOX MOBILE UI DESIGN SYSTEM

Urban Entertainment Infrastructure Platform

Mobile Product Design Language & Interface Standards

1. DESIGN PHILOSOPHY

Core Design Thesis

NOX should feel like:

- luxury nightlife infrastructure
- cyberpunk-inspired fintech
- urban culture operating system
- cinematic digital experience

The interface must balance:

- premium minimalism
 - nightlife energy
 - high usability
 - social engagement
 - mobile-first speed
-

EXPERIENCE GOAL

Users should feel:

- socially connected
- culturally aware
- elevated
- exclusive
- immersed in nightlife energy

The app should create:

FOMO with sophistication.

Not chaos.

2. DESIGN PRINCIPLES

Principle 1 — Dark Mode First

The product is designed primarily for nighttime usage.

Dark UI improves:

- immersion
- battery efficiency
- nightlife aesthetics
- visual focus

Principle 2 — Cinematic Depth

Use:

- blur
- layered shadows
- glowing highlights
- atmospheric gradients
- transparent overlays

The UI should feel alive.

Principle 3 — Motion With Purpose

Animations should:

- guide attention
- reinforce hierarchy
- create emotional flow

Avoid excessive gimmicks.

Principle 4 — Information Clarity

Even with immersive visuals:

- ticket prices

- event times
 - CTAs
 - QR access must remain immediately readable.
-

3. VISUAL LANGUAGE

Visual Identity Keywords

- neon
 - cinematic
 - urban
 - luxury
 - modern
 - underground
 - magnetic
 - atmospheric
-

UI Aesthetic Inspiration

Closest design references:

- Apple Music
 - DICE
 - Resident Advisor
 - Spotify Canvas
 - modern fintech apps
 - cyberpunk interfaces
-

4. COLOR SYSTEM

PRIMARY COLORS

NOX Black

HEX: #070707 Usage: Primary background.

Deep Graphite

HEX: #141414 Usage: Cards and surfaces.

Electric Cyan

HEX: #00AEFF Usage: Primary actions.

Neon Violet

HEX: #8B5CF6 Usage: Accent lighting.

SECONDARY COLORS

Ice White

HEX: #F5F7FA Usage: Primary text.

Soft Gray

HEX: #A1A1AA Usage: Secondary text.

Emerald Pulse

HEX: #00D68F Usage: Success states.

Warning Amber

HEX: #F59E0B

Error Red

HEX: #EF4444

5. TYPOGRAPHY SYSTEM

PRIMARY FONT

Satoshi

Fallback: Inter

TYPOGRAPHY SCALE

Hero

48–56px Heavy Tight spacing

H1

36px Bold

H2

28px Bold

H3

22px SemiBold

Body Large

18px Regular

Body

16px Regular

Caption

13px Medium

TEXT RULES

Headlines

- short
 - impactful
 - cinematic
-

UI Labels

- uppercase selectively
 - increased letter spacing
 - compact hierarchy
-

6. SPACING SYSTEM

Grid System

Base unit: 4px

Spacing Scale

4 8 12 16 20 24 32 40 48 64

Layout Rules

Use generous spacing.

Luxury UI relies heavily on:

- whitespace

- breathing room
 - clean composition
-

7. BORDER RADIUS SYSTEM

Radius Scale

Small: 12px

Medium: 20px

Large: 28px

Hero Cards: 36px

8. SHADOW & GLOW SYSTEM

Card Shadows

Use soft cinematic shadows.

Avoid:

- harsh drop shadows
 - outdated material design aesthetics
-

Glow Effects

Used selectively for:

- primary CTAs
 - ticket status
 - active navigation
 - live indicators
-

Glow Colors

Electric Cyan Glow Neon Violet Glow

9. ICONOGRAPHY

Icon Style

Recommended:

- Lucide
 - Phosphor Icons
-

Icon Characteristics

- minimal
- rounded
- clean
- futuristic

Avoid:

- cartoon icons
 - bulky iconography
-

10. BUTTON SYSTEM

PRIMARY BUTTON

Style:

- filled cyan
- black text
- glowing hover state

Usage: Primary CTA.

Examples:

- Secure Entry
 - Buy Ticket
 - Explore Events
-

SECONDARY BUTTON

Style:

- outlined
 - transparent background
 - subtle glow on interaction
-

GHOST BUTTON

Style:

- minimal
 - no heavy borders
 - text-driven interaction
-

BUTTON STATES

Required:

- default
 - pressed
 - disabled
 - loading
 - success
-

11. CARD SYSTEM

Event Card

Contains:

- cover image
 - title
 - venue
 - date/time
 - price
 - CTA
-

Visual Style

- rounded corners
 - cinematic photography
 - subtle overlays
 - elevated appearance
-

Card Behavior

Interactions:

- scale slightly on tap
 - glow on hover
 - smooth transition
-

12. NAVIGATION SYSTEM

Bottom Navigation

Tabs:

- Discover
- Tickets
- Create
- Inbox

- Profile
-

Navigation Style

- floating glass effect
 - blurred background
 - active neon glow
-

Top Navigation

Contains:

- city selector
 - notifications
 - search
 - profile shortcut
-

13. DISCOVERY FEED DESIGN

Feed Layout

Structure:

1. Hero Banner
 2. Trending Events
 3. Genre Filters
 4. Nearby Events
 5. Recommended Events
 6. Upcoming Events
-

Feed Experience

The feed should feel:

- dynamic
- alive
- culturally active
- socially relevant

14. EVENT DETAIL SCREEN

Hero Section

Contains:

- cinematic cover image
- gradient overlay
- title
- venue
- CTA button

Sections

Event Info

Ticket Tiers

Lineup

Venue Details

Social Activity

Related Events

Interaction Behavior

Sticky CTA: "Secure Entry"

Always visible.

15. TICKET UI

Digital Ticket Design

The ticket must feel:

- premium
 - secure
 - collectible
 - futuristic
-

Ticket Elements

Contains:

- animated QR
 - event branding
 - user name
 - timestamp
 - ticket tier
 - holographic gradients
-

Ticket States

- active
 - used
 - expired
 - transferred
-

16. QR SCANNER UI

Scanner Experience

The scanner UI should feel:

- fast
- operational
- trustworthy

Scanner Components

- camera frame
 - validation animation
 - success pulse
 - rejection warning
 - scan history
-

Validation Colors

Success: Emerald Pulse

Failure: Error Red

17. PROMOTER DASHBOARD UI

Dashboard Aesthetic

More operational. Still premium.

Key Dashboard Modules

Revenue Cards

Attendance Charts

Ticket Analytics

Guest List Management

Event Performance

Data Visualization

Charts should be:

- minimal
- glowing
- easy to scan quickly

Avoid:

- cluttered enterprise dashboards
-

18. MICROINTERACTIONS

Recommended Animations

Card Hover

Subtle scale increase.

Ticket Purchase Success

Pulse glow animation.

QR Validation

Fast confirmation flash.

Notification Arrival

Soft slide-in.

Motion Timing

Fast. Smooth. Responsive.

Recommended: 200–350ms transitions.

19. ACCESSIBILITY

Accessibility Rules

Required:

- strong text contrast
 - scalable typography
 - large tap areas
 - screen reader labels
-

Tap Targets

Minimum: 44px height.

20. DESIGN TOKENS

Token Naming

Example:

```
{
  "color.primary": "#00AEEF",
  "color.background": "#070707",
  "radius.large": "28px",
  "spacing.md": "16px"
}
```

21. FIGMA FILE STRUCTURE

Recommended Pages

Foundations

- colors
 - typography
 - spacing
 - shadows
-

Components

- buttons
 - cards
 - navigation
 - inputs
-

Screens

- onboarding
 - feed
 - event detail
 - tickets
 - profile
 - dashboard
-

Prototypes

- consumer flows
 - promoter flows
 - ticket flows
-

22. REQUIRED MVP SCREENS

Consumer Screens

Splash Screen

Onboarding

Login

Home Feed

Event Detail

Ticket Checkout

Digital Ticket

Saved Events

Profile

Promoter Screens

Dashboard Home

Event Creation

Ticket Analytics

Guest Lists

QR Scanner

23. BRAND EXPERIENCE STRATEGY

Emotional Positioning

The app should feel like:

"You are plugged into the city's hidden pulse."

NOT:

"generic event marketplace."

Desired User Reactions

Users should feel:

- informed
 - socially elevated
 - culturally connected
 - part of the scene
-

24. FUTURE UI EVOLUTION

Phase 2 Features

Social Layer

- friend attendance
 - creator follows
 - event chat
-

AI Recommendations

- personalized events
 - nightlife predictions
 - social recommendations
-

Fintech Layer

- wallet UI
 - rewards systems
 - nightlife credits
-

25. FINAL UI THESIS

The NOX UI should combine:

- cinematic nightlife energy
- fintech clarity
- luxury product design
- mobile-native interactions
- social immersion

The strongest execution path is:

“Dark luxury urban infrastructure.”

That positioning differentiates NOX from:

- generic ticketing apps
- chaotic social media discovery
- corporate event platforms

while creating a scalable identity that can evolve into:

- entertainment infrastructure
- nightlife fintech
- creator ecosystem platform
- urban social operating system.
